X U H U

SENIOR SOFTWARE ENGINEER

EXPERIENCE

Senior Software Engineer - FreeWheel

since July 2014

Working as a full-stack web developer in UI team.

- Maintain legacy UI system buding with RoR and jQuery
- Use an internal frontwork SparkUI to refactor the business specific module

PROJECTS

react-go-boilerplate

React.js · Redux · Webpack · blessed · Go · Docker

A boilerplate for fastly building the frontend & backend separated web application.

- Support hot reload for both frontend & backend.
- Provide a dashboard based on blessed in development mode.
- Support using Docker to deploy the application

blogo

Go

A static blog system.

- Use Go to build the server and render the page with http/template.
- Posts are stored as Markdown docs.

bar

React.js · Redux · Go · MongoDB

A small twitter system.

- Any visitors who get access can publish/append/reply a post.
- Frontend & backend separated.
- Contents are stored in MongoDB.

yrel

Go · Yacc · React.js · Redux

A small script language.

- Use Go to implement the Lexer.
- Use goyacc to generate the Parser
- Get the AST of the source code and directly execute it
